

A GOOD SPACE TO FIND GREAT INFORMATION

The library's print and online resources mean students and faculty can find what they want when they want it. Additional resources available through ILL.

The library staff is available to help faculty locate the resources they need to help today's students become tomorrow's lifelong learners.

WELCOME

The Savannah Technical College libraries are physical and online spaces where students, faculty, and staff can find, evaluate, and use information.

Teaching every user to be

information literate through hands-on instruction on how to locate information in print and online formats is important. In following Savannah Technical College's vision to create "lifelong learners" the librarian works with faculty to ensure all students are familiar with the library's resources.

The librarian works closely with faculty to design library assignments that utilize the library's available resources. Information Literacy instruction with a specific assignment in mind helps students focus their research and use the library's resources most effectively.

Title suggestions to supplement what is covered in the textbooks are always welcome.
