

## Savannah Technical College's State Licensure Disclosures

Federal regulations require colleges to disclose information regarding their occupational programs that require licensure or certification to be employed and the status of the program for meeting an individual state's licensure/certification requirements. To determine if a program meets licensure/certification requirements, locate the program of choice and view the status that program has for the state in which you are located. If that state does not appear in the "Program meets Licensure Requirements" column, Savannah Technical College cannot guarantee the program of study fulfills that state's requirements.

Program Leading to Certification	States in which program meets Licensure or Certification Requirements	States in which Program does NOT meet Licensure/ Certification Requirements	States in which it has not been determined if Program meets Licensure/Certification Requirements	Notes and Additional Links
