

2024 Student Achievement Data

IPEDs Outcome Measures

These measures provide the 8-year award-completion rates by award level (certificates, associate's and bachelor degrees) after entering an institution. For students who did not earn any undergraduate award after 8-years of entry, the enrollment statuses are reported as either still enrolled at the institution, or subsequently transferred out of the institution. Unlike the Graduation Rates data, all reporting institutions must report on their transfer outs regardless if the institution has a mission that provides substantial transfer preparation. Current year data will be available the following fall.

Retention Rates

A fall cohort is tracked through the following academic year for retained or graduated students. Students in a cohort are retained if they enrolled in any postsecondary institution included in the National Student Clearinghouse (NSC) during the following academic year or graduated from any such institution during the two-year period. The fall cohort (denominator) includes first-time students (full-time or part-time) at that college during the fall or summer semester, excluding prior high school dual enrollment. Students must be regular admits only (not provisional, developmental, or special admit) and may not be high school or transient student type. All major codes are included, including students who are not enrolled in an award program, e.g. IA00.

Job Placement Rate (Overall)

The placement rate tracks a cohort of graduates through September 15 of the following year and uses the latest employment status entry for each student. The rate is calculated as follows: Numerator: Employed in Field + Military+ Employed in Related Field + Employed in Unrelated Field + Employed in Field & Continuing Education + Employed in Related Field & Continuing Education + Employed in Unrelated Field & Continuing Education + Continuing Education. Denominator: Numerator + Not Employed. Job placement data for current year will not be available until the Fall.

Job Placement Rate (In-Field)

The in-field placement rate tracks a cohort of graduates through September 15 of the following year to show the percentage who employed in a field related to their award program. The rate is calculated as follows: Numerator: Employed in Field + Military + Employed in Related Field + Employed in Field & Continuing Education + Employed in Related Field & Continuing Education. Denominator: Total Grads - (Continuing Education & Employed in Unrelated Field + Continuing Education + Unavailable). Job placement data for current year will not be available until the Fall.
